Supplemental Table 1. Characterization of non-hematolymphoid/soft tissue involved by tMBL.

Site	(n)=16	Indication for Biopsy	tMBL Phenotype
Neck ST	(2)	Localized mass	CLL-type (n=16)
Pelvic ST	(1)	Non-specific lymphadenopathy	
Lacrimal Gland	(1)	Localized mass	
Paraspinal ST	(1)	Surveillance of hematologic neoplasm	
Base of Tongue	(1)	Non-specific lymphadenopathy	
Mesentery	(2)	Localized mass, Non-specific lymphadenopathy	
Breast	(1)	Localized mass	
Prostate	(1)	Enlarged prostate	
Nasopharynx ST	(1)	Mucosal lesion	
Bone/Synovium	(2)	Join replacement	
Colon Polyp	(1)	Colon cancer screening	
Liver	(1)	Management of hepatitis C	
Small bowel	(1)	Surveillance of inflammatory bowel disease	

ST= soft tissue, tMBL= tissue monoclonal B-cell lymphocytosis, CLL= chronic lymphocytic leukemia
