Research Papers

Development of an Effective Two-Step Enrichment Process To Enhance BAX System Detection of Healthy and Injured Salmonella Enteritidis in Liquid Whole Egg and Egg Yolk  Shishi Huang, Tay Boon Hui, Hyun-Gyun Yuk, and Qianwang Zheng*  ................................................................. 397

Rapid Identification of Campylobacter Strains Cultured under Aerobic Incubation Using Hyperspectral Microscope Imaging  Matthew Eady, Bosoon Park,* and Arthur Hinton, Jr.  ................................................................. 405

Inactivation of Escherichia coli K-12 in Liquid Egg White by a Flow-Through Pulsed UV Light Treatment System  Beining Ouyang, Ali Demirci,* and Paul H. Patterson  ................................................................. 418

An Insight into Surface Topographical Parameters and Bacterial Adhesion: A Case Study of Listeria monocytogenes Scott A Attachment on 304 Stainless Steel  Jayanti Das, Jennifer A. Chase, Melissa L. Partyka, Edward R. Atwill, and Barbara Linke*  ................................................................. 426

Viability of Shiga Toxin–Producing Escherichia coli, Salmonella, and Listeria monocytogenes within Plant versus Beef Burgers during Cold Storage and following Pan Frying  John B. Luchansky,* Bradley A. Shoyer, Yangjin Jung, Laura E. Shane, Manuela Osoria, and Anna C. S. Porto-Fett  ................................................................. 434

Analysis of Benzalkonium Chloride Resistance and Potential Virulence of Listeria monocytogenes Isolates Obtained from Different Stages of a Poultry Production Chain in Spain  Victoria López-Alonso, Sagrario Ortiz, Alfredo Corujo, and Joaquín V. Martínez-Suárez*  ................................................................. 443

Reduction in the Radiocesium in Meats of the Sika Deer and Wild Boar by Cooking  Mayumi Hachinohe,* Ryusuke Fujimoto, Takuro Shinano, Eiichi Kotake-Nara, Shioka Hamamatsu, and Shinichi Kawamoto  ................................................................. 467

Shiga Toxin–Producing Escherichia coli Contamination of Raw Beef and Beef-Based Ready-to-Eat Products at Retail Outlets in Pretoria, South Africa  Libby O. Onyeka, Abiodun A. Adesiyun, Karen H. Keddy, Evelyn Madoroba, Ayanda Manqele, and Peter N. Thompson*  ................................................................. 476

Evaluation of Aflatoxin Concentrations and Occurrence of Potentially Toxigenic Fungi in Imported Chia Seeds Consumed in Thailand  Usuma Jemmnak,* Chompoonek Yurayart, Annart Poapolathep, Saranya Poapolathep, Kanjana Imsilp, Phanwimol Tanhan, and Orawan Limsviliat  ................................................................. 497

Health Risk Assessment of Exposure to Heavy Metals from Sheep Meat and Offal in Kuwait  Samir Mohammed Abd-Elghany, Mahmoud Ahmed Mohammed, Adel Abdelkhalak, Faisal Saad Saud Saad, and Khalid Ibrahim Sallam*  ................................................................. 503

Preparation of Barije (Ferula gummosa) Essential Oil–Loaded Liposomes and Evaluation of Physical and Antibacterial Effect on Escherichia coli O157:H7  Masoud Najaf Najafi,* Anita Arianmehr, and Ali Mohammad Sani  ................................................................. 511

PCR–Restriction Fragment Length Polymorphism and Pulsed-Field Gel Electrophoresis Characterization of Listeria monocytogenes Isolates from Ready-to-Eat Foods, the Food Processing Environment, and Clinical Samples in South Africa  Diane Rip* and Pieter A. Gouws  ................................................................. 518

Cell Growth Density and Nisin A Activity of the Indigenous Lactococcus lactis subsp. cremoris M78 Costarter Depend Strongly on Inoculation Levels of a Commercial Streptococcus thermophilus Starter in Milk: Practical Aspects for Traditional Greek Cheese Processors  John Samelis* and Athanasia Kakouri  ................................................................. 542

Research Notes

Evaluation of Bead-Based Assays for the Isolation of Foodborne Viruses from Low-Moisture Foods  Neda Nasheri,* Jennifer Hartlow, Angela Chen, Nathalie Comeau, and Sabah Bidawid ................................. 388

Evaluation of Chlorine Dioxide Gas against Four Salmonella enterica Serovars Artificially Contaminated on Whole Blueberries  Bassam A. Annous,* David Buckley, and Angela Burke .................................................. 412

Consumers’ Awareness and Trust toward Food Safety News on Social Media in Malaysia  Jan Mei Soon* .................. 452

Isolation and Characterization of Non-O157 Shiga Toxin–Producing Escherichia coli in Foods Sold at Retail Markets in China  Guangzhu Yang, Shuhong Zhang, Yuanbin Huang, Qinghua Ye, Jumei Zhang, Qingping Wu,* Juan Wang, Moutong Chen, and Liang Xue ................................................................. 460

Microbiological Quality of Powdered Infant Formula in Latin America  Julio Parra-Flores,* Eduard Maury-Sintjago, Alejandra Rodriguez-Fernández, Sergio Acuña, Fabiola Cerda, Juan Aguirre, and Ondrej Holy ...... 534

General Interest

Salmonella and Shiga Toxin–Producing Escherichia coli in Products Sampled in the Food Safety and Inspection Service Raw Pork Baseline Study  Maria E. Scott,* Evelyne Mbandi, Stephanie Buchanan, Naser Abdelmajid, Christian Gonzalez-Rivera, Kis Robertson Hale, Lisa Jacobsen, Jennifer Webb, Jennifer Green, and Paul Dolan ................................................................. 552
