¹: adjusted for age at death (or censoring), monitored for internal radiation, decade of start of employment on site, age at start of employment, process worker (yes/no), socio-economic status. Industrial non-radiation workers included in reference groups.

²: adjusted for age at death (or censoring), cumulative external radiation dose, decade of start of employment on site, age at start of employment, process worker (yes/no), socio-economic status. Not monitored groups include non-radiation workers.
